

# Web Designing Project

Tech Review Website

---

- Amar Kant Kumar
- Divyansh Singh

# Introduction

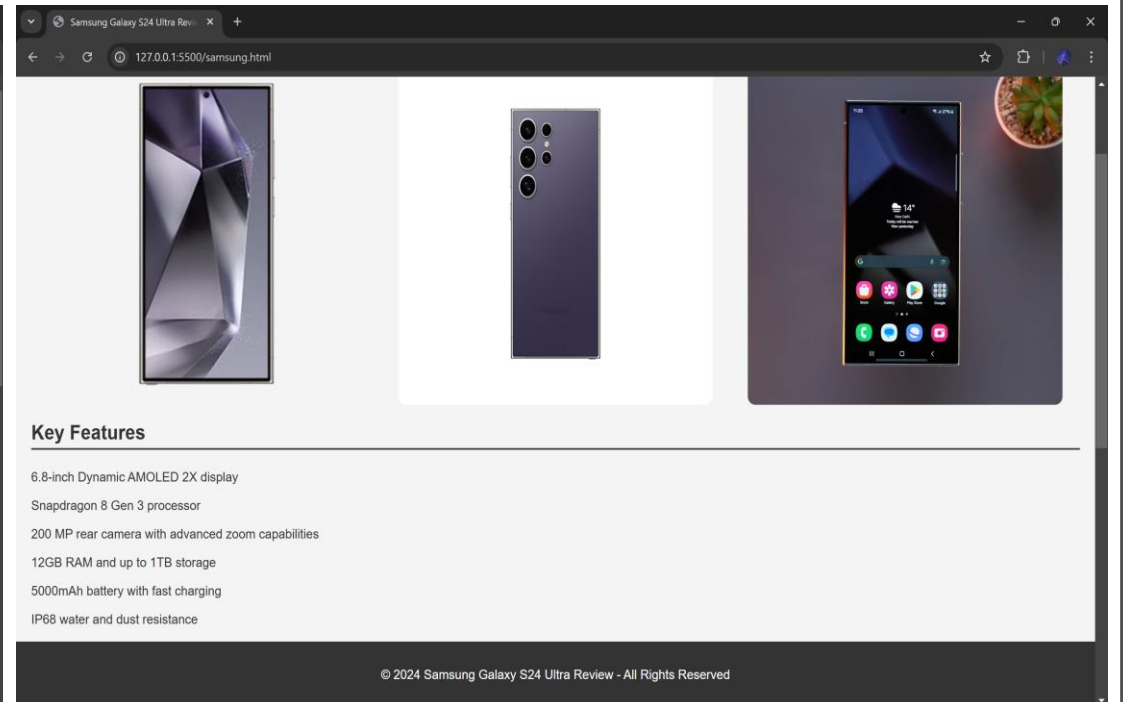

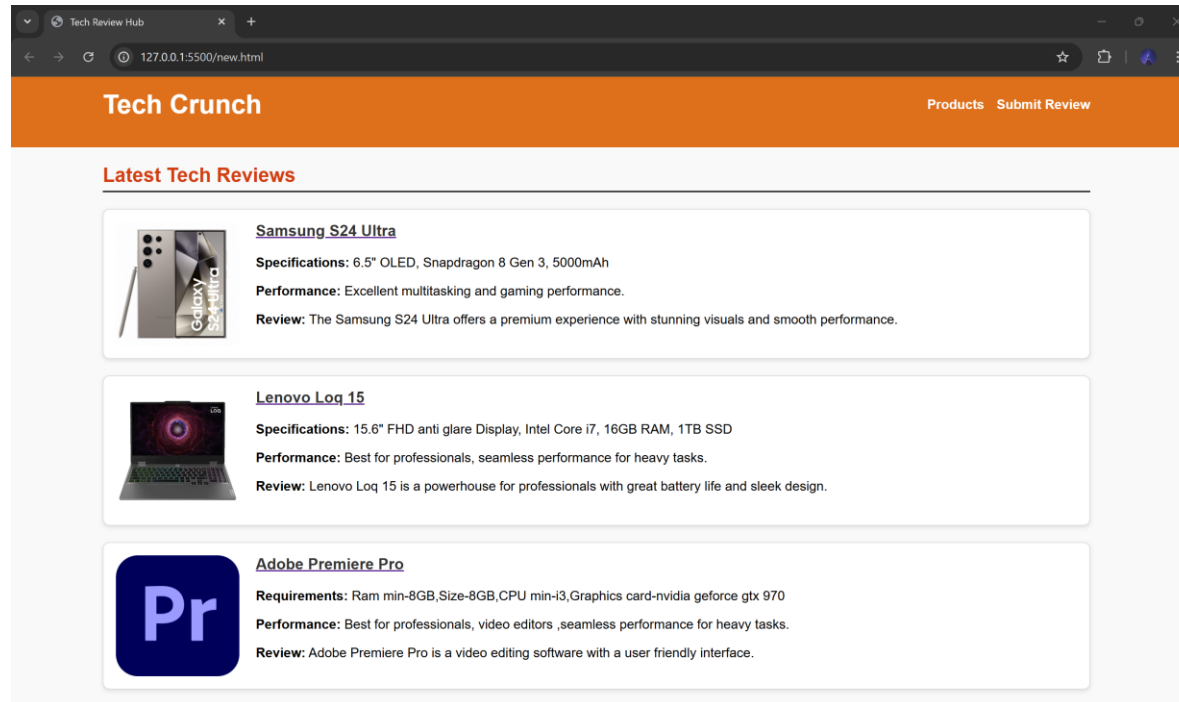

Web design involves creating the visual layout and aesthetics of a website, focusing on user experience, graphics, and overall look. The different areas of web design include web graphic design; [user interface design](#) (UI design); authoring, including standardized code and [proprietary software](#); [user experience design](#) (UX design); and [search engine optimization](#).

Web design involves creating the visual elements and layout of a website using programming languages like HTML, CSS. while coding involves translating these designs into a functional website using JavaScript.

# Website overview

- The primary goal of the website is to empower consumers with accurate, up-to-date information on tech products to help them make informed purchasing decisions. By providing honest, well-researched reviews, the website aims to become a trusted source for tech enthusiasts and buyers

# Tags used in webpage

- `<head>` tag
- `<body>` tag
- `<heading>` tag-`h1,h2,h3.....`
- `<img>` tag
- `<p>` tag
- `<a href>`-link tag
- `<li>/<ul>` tag
- `<br>` tag
- `<strong>` tag
- `<div>` tag

`</h1>`

`<html>`

`<li>`

# Conclusion

The Tech Review Website project is designed to be a comprehensive, reliable, and user-friendly platform that empowers consumers with the information they need to make informed decisions about technology products and services. By offering detailed reviews, comparisons, and expert insights, the website will serve as a trusted resource for tech enthusiasts, professionals, and casual buyers alike.

THANK YOU
